

Chemstat 6530/60DCHF

CHEMICAL NAME Ester on Silica

CAS NUMBER Mixture

FUNCTION Antistatic Agent

TECHNICAL REQUIREMENTS Appearance @25°COff-White to Light Yellow Powder
Actives, % 58-62

GENERAL DATA Specific Gravity @ 25°C..... 0.35
Pounds Per Gallon 2.92

APPLICATION Chemstat 6530/60DCHF was developed as an antistat for homopolymer PP thermoformed and molded applications where indirect food contact approvals are needed. This product is offered as a free flowing powder. Please refer to the following page for specific FDA information. This antistat offers good performance at humidity levels at or above 30% relative humidity. Chemstat 6530/DCHF will also work in other polyolefin applications.

Revision Date: 18.08.2021

Chemstat 6530/60DCHF

FDA Information

Components of Chemstat® 6530/60DCH have US-Food and Drug Administration (US-FDA) approvals as listed at 21 CFR §178.3400, Emulsifiers and/or surface-active agents; 21 CFR §184.1323, Glycerol monooleate, where the substance is generally recognized as safe (GRAS); and 21C.F.R. §182.90 where the carrier is generally recognized as safe (GRAS).

The quantity used shall not exceed the amount necessary to accomplish the intended technical effect. Cites must be consulted for applicability to the intended usage.
